Robots that feel?

Futurologists predict that many homes will have robots in the future. Robots already do many things such as building cars and vacuuming floors. But scientist today is starting to build friendlier and more intelligent robots – ones that people will feel more comfortable having around in the house.

Sociable robots will be able to show feelings with their faces, just like humans. They will smile and frown, make eye contact and speak. These robots will do work around the house such as cooking and cleaning. They will even take care of children and the elderly.

1. In the future, many homes won't have a robot.

True

False 

2. Robots will be friendlier and more intelligent.
