TIP

To go to the Ice Hotel.

A Place with a Difference

 10

In the very north of Sweden there is a village of only about 1,000 inhabitants. In winter, temperatures are normally around -10°C . The nights are long and there are only six hours of daylight, so why do tourists visit Jukkasjärvi in winter? Well, it's quiet: there isn't any traffic and there aren't any noisy malls. There's a small restaurant with local food and a museum with a souvenir shop. But the real attraction is the amazing Ice Hotel.

The Ice Hotel is incredibly beautiful. It's different every year and ... it's all ice. The building, the reception, the plates in the restaurant, the bedrooms ... the beds! Everything is made of ice. The temperature in the hotel is -5°C , but there are special clothes and sleeping bags for guests. The hotel is open from December until April (there isn't any ice in summer, of course) and it's very popular. There are also ice hotels in Canada and Romania but there aren't any ice hotels in Morocco or Italy.
