 **SACO OLIVEROS**

New Zealand Loves Cycling

In New Zealand, cycling offers great Kiwi experiences such as traveling through time to gold mining days, visiting famous movie locations and diving into a thermal pool. It is a popular sport, with many quiet roads, forest trails and cycling tracks, with easy riding for the less experienced.

'Love 'em or hate 'em, bikes are here to stay', New Zealanders say. From the law graduate running a cargo bike delivery company to the velodrome track racer, the cycling culture is spreading all around. In addition to the commuter and the bike tourist, some other people have cycled lately:

The e-biker:

Some people, particularly those who are older or suffer from some diseases, have purchased an electric bike which gives them a power boost on hills, is fast, offers no parking problems and is easy to get around on.

The cargo bike courier:

They can deliver packages weighing up to 80 kilos. The bike's easy to maneuver and a 'green' way to get goods from A to B. Biking in the winter? No problem: wear a waterproof jacket and keep moving to stave off the cold!

The trendy campaigner:

Riding a vintage-style bike can be a great way of drawing people's attention, especially adults, to get into cycling. According to these bike riders, the main barrier to adult cycling is not cycling itself, but changing their habits. They believe people need to make changes to their lives in order to make cycling work.

1  64 Read and listen. Then answer the questions.

UNIT 7

Adopt an Animal!

For just US\$36 a year you can adopt an animal.

Adopt an Animal!

For just US\$36 a year you can adopt an animal. All these animals are in danger of extinction, but you can adopt them and help them to survive.

Adopt a Turtle!

Have you eaten turtle soup? Some people hunt turtles for their meat and their eggs. Turtles are older than dinosaurs, but they could soon disappear if we don't act fast!

Adopt an Asian Elephant!

African elephants are the largest land animals, but their Asian cousins are in danger of extinction. Their natural habitat is getting smaller because we – humans – are moving into their territory. People also hunt these animals for their tusks, which are made of ivory.

Adopt an Orangutan!

Have you ever wanted an unusual pet? Did you know that people hunt orangutans for pets? They also hunt them for meat. However, the greatest danger to orangutans is the destruction of their rain forest habitat.
