How to Build your
Own School

**Young Woman in School
Fundraising Project**

Have you ever considered living abroad to set up a charity project? If so, Felicity's story will inspire you.

Felicity Marks is a busy young woman. In 2002 she spent four months teaching street children at The Street Academy school in Accra, Ghana. When she came home, she decided that she wanted to do more to help educate the city's children. So, in 2003, she set up a charity called The Street Academy Annexe Project.

In Ghana, most parents have to pay to send their children to school, but The Street Academy offers free education to children aged 8-18, as well as uniforms, books and a decent meal each day. But the conditions are very basic. The building is a wooden hut with three different classes in the same room and no other facilities. The aim of Felicity's Street Academy Annexe Project is to raise enough money to build a bigger school with at least four classrooms, toilets, a soccer field and an auditorium.

So what has Felicity done to raise money for this ambitious project? She's already done many different things: 'First we had a big party to launch the charity. We've already organized quiz nights and on-line competitions, we've sold cakes and I've done sponsored walks and skydives. Other people have just helped raise money on our behalf, which really helps'. So how much money has she raised?

'We haven't raised enough money yet! We need enough money to build a school where the kids can learn in proper conditions. We've received the architect's plans and we love them because they've taken the kids' ideas into consideration. For example, the windows are in the shape of triangles and stars!' Does Felicity recommend a project like this? 'Yes, but this type of project isn't easy. It has taken a long time and there have been problems and obstacles. But in the end, it's been worth it.'
