Reviews: Amazing activity weeks

There are some great activity weeks out there, but don't just take our word for it – find out what the participants have said!

Boreatton Park, Shropshire, England

Have you always wanted to learn to drive, but you haven't turned 17 yet? Don't worry – this six-day activity course is for 13–16-year-olds! I've wanted to **get behind the wheel** for years, so this was the perfect opportunity! I really was allowed to drive a real car – a Mini Cooper, no less! Obviously we didn't drive on real roads, but we had plenty of practice every morning at a special **off-road** location. Have I passed my test yet? No, I haven't – unfortunately that's not legal yet! But I have learned how to drive and park the car, and how to pass the theory test. As well as that, I tried quad-biking and go-karting, and made some great new friends!

Alice (14)

Different locations in England and Scotland

Whether you've been a mini-chef for years or you've just started cooking, I'd definitely recommend Root Camp. I've learned to bake bread, catch fish and survive for a week without Wi-Fi! Honestly, it was great fun meeting everyone else and camping on the Isle of Bute in Scotland. I've enjoyed cooking since I was a kid, but I never realized it could be so creative! This course has definitely inspired me. Since coming home, I've **experimented** with some new dishes. I've uploaded photos of them on Instagram – have a look [here](#)! (By the way, this six-day **residential** course is for 15–21-year-olds.)

Ben (16)

Lancing College, Brighton, England

I've just finished a Robotics course at Fire Tech. What an amazing week! If you've ever wanted **to master** robotics, this is the course for you. I've learned to design my own robot, build it using a VEX IQ kit, and program it in the **ROBOTIC** language. It was very **hands-on** and we tested our robots in real competitions. We worked in teams and it was really exciting to see whose robots would win. I also learned to write computer code. This one-week course is for under-17s, and other Fire Tech courses include app design, video game design and digital music production. I've already put them on my wish list!

Cora (15)

► Subskill: Scanning for specific information

When you scan a text, you read it very quickly to look for specific information. It doesn't matter if you don't understand all the words.

3 Scan the reviews and complete the table.

	Driver course	Cooking course	Robotics course
Age	1 13 to 16	2 15 to 21	3 under-17s
Number of days	4 6	5 6	6 5/one week

4

11

Read and listen to the text. Make a list of three new skills that Alice, Ben and Cora learned.

Alice: how to drive, _____, _____

Ben: how to _____, _____, _____

Cora: how to _____, _____, _____

Learn new skills!

Ben (16)

Lancing College, Brighton, England

I've just finished a Robotics course at Fire Tech. What an amazing week! If you've ever wanted **to master** robotics, this is the course for you. I've learned to design my own robot, build it using a VEX IQ kit, and program it in the ROBOTIC language. It was very **hands-on** and we tested our robots in real competitions. We worked in teams and it was really exciting to see whose robots would win. I also learned to write computer code. This one-week course is for under-17s, and other Fire Tech courses include app design, video game design and digital music production. I've already put them on my wish list!

Cora (15)

4  **11** Read and listen to the text. Make a list of three new skills that Alice, Ben and Cora learned.

Alice: how to drive, park the car, pass the theory test

Ben: how to bake bread, catch fish, Survive without Wi-Fi

Cora: how to design a robot, build a robot, program a robot

6 Read the text again and answer the questions.

- 1** Why hasn't Alice passed her test yet?
- 2** What other activities did Alice try?
- 3** Did Ben stay in a hotel?
- 4** What did Ben do after the cooking course?
- 5** How did Cora test her robot?
- 6** What other Fire Tech courses are there?

7

Write questions for the answers about Alice, Ben and Cora. Start with the words given.

1 What kind of car did Alice drive?

She drove a Mini Cooper®.

2 How old is Alice?

She's 14.

3 Can Ben make bread?

Yes, he can. He learned on the course.

4 Could Ben use his mobile during the course?

No, he couldn't. There wasn't any Wi-Fi.

5 What did Cora learn?

She learned to design and build robots.

6 Did Cora have a good time?

Yes, she did. She had a great week!

CRITICAL THINKING

SUPER
SKILLS

1 Understand Think about the courses on p27. Which one sounds most interesting to you? Write sentences.

I'd like to ...

I'm not sure about ...

2 Analyze Examine your preferred options. What are the advantages and disadvantages?

3 Evaluate Decide which course sounds most interesting to you. Explain your reasons and how you reached your decision.

I'd like to do the _____ course because

_____ .

CELEBRITY CORNER

Mexican racing driver Sergio “Checo” Perez won a Formula 1 Grand Prix at the age of 30. How old was he when he started go-kart racing?

5

Word work

Find words or expressions in

the text that mean:

- 1 try new ideas or methods (v)
- 2 practical (adj)
- 3 drive (an expression with v+n)
- 4 become an expert at something (v)
- 5 when you live at the place you're studying (adj)
- 6 not on real roads (adj)

Off - road
