# The Beatles

The Beatles are the most successful band in history. They have sold more than one billion records and were a product of the 1960s, a decade many refer to as the *Swinging Sixties*. The Beatles still have a huge influence on pop and rock music and a lot of bands today use their same ideas. Firstly, they were the songwriters as well as the performers. Two members of the band, Paul McCartney and John Lennon, wrote most of the songs. They also played instruments, such as guitars, the drums and vocals. Their songs are short and the lyrics are easy to memorize. The melody of the song is very simple but effective, and the chorus often repeats the title of the song. The Beatles aren't the only band that use this formula. The Rolling Stones, The Kinks and The Who all influenced pop and rock music.
