MOTIVATING STRATEGY

Resumen

HELICO THEORY

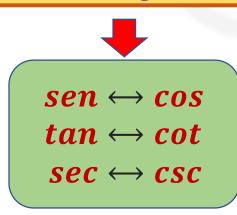

Reducción al primer

* Ángulos menores a una vuelta: Liemplos:

$$RT\left(\frac{180^{\circ}}{360^{\circ}} \pm x\right) = \pm RT(x)$$

$$RT\left(\frac{90^{\circ}}{270^{\circ}} \pm x\right) = CO - RT(x)$$

CO-Razones Trigonométricas

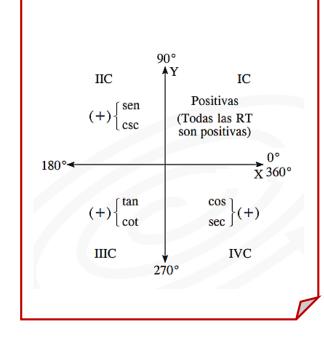

$$sen(180^{\circ} - \theta) = sen\theta$$
IIC

$$\cos(180^{\circ} + \theta) = -\cos\theta$$
IIIC

$$sec(270^{\circ} + \theta) = csc\theta$$
IVC

Problema 05

HELICO PRACTICE

Simplifique

$$\mathsf{E} = \frac{\mathrm{sen}(270^\circ + \mathrm{x})}{\mathrm{cos}(180^\circ + \mathrm{x})}$$

RECORDEMOS

$$RT\left(\frac{180^{\circ}}{360^{\circ}} \pm x\right) = \pm RT(x)$$

$$RT\left(\frac{90^{\circ}}{270^{\circ}}\pm x\right) = \pm CO - RT(x)$$

RESOLUCIÓN

$$E = \frac{\sin(270^{\circ} + x)}{\cos(180^{\circ} + x)}$$
IIIC

$$E = \frac{-\cos x}{\cos x}$$

$$E = 1$$

RESOLUCIÓN

Simplifique

$$\mathsf{E} = \frac{\sec(270^{\circ} + x)}{\cos(180^{\circ} + x)} + \frac{\sec(270^{\circ} - x)}{\csc(180^{\circ} + x)}$$

RECORDEMOS

$$RT\left(\frac{180^{\circ}}{360^{\circ}} \pm x\right) = \pm RT(x)$$

$$RT\left(\frac{90^{\circ}}{270^{\circ}}\pm x\right) = \pm CO - RT(x)$$

$$\mathsf{E} = \frac{\sin(270^{\circ} + x)}{\cos(180^{\circ} + x)} + \frac{\sec(270^{\circ} - x)}{\csc(180^{\circ} + x)}$$

IIIC

$$\mathsf{E} = \frac{1}{1/\cos x} + \frac{1}{1/\cos x}$$

IIIC

$$E = 1 + 1$$

$$E = 2$$

Simplifique

$$E = sen(90^{\circ} + x).csc(270^{\circ} - x)$$

RECORDEMOS

$$RT\left(\frac{90^{\circ}}{270^{\circ}} \pm x\right) = \frac{1}{2}CO - RT(x)$$

$$cos\theta.sec\theta = 1$$

IIC

IIIC

$$E = sen(90^{\circ} + x).csc(270^{\circ} - x)$$

$$E = \cos x.(-\sec x)$$

$$E = -1$$

RESOLUCIÓN

N

Anthony es un estudiante muy curioso; por eso, desea averiguar cuánto es la distancia en kilómetros desde Lima hasta Ica. Para ello, deberá reducir la siguiente expresión.

$$M = \frac{250sen(180^{\circ} - x)}{\cos(90^{\circ} - x)} + \frac{60sec(360^{\circ} - x)}{\csc(270^{\circ} + x)}$$

¿Cuál es la distancia de Lima hacia lca?

RECORDEMOS

$$RT\left(\frac{180^{\circ}}{360^{\circ}} \pm x\right) = \pm RT(x)$$

$$RT\left(\frac{90^{\circ}}{270^{\circ}}\pm x\right) = \pm CO - RT(x)$$

IVC

$$M = \frac{250sen(180^{\circ} - x)}{\cos(90^{\circ} - x)} + \frac{60sec(360^{\circ} - x)}{\csc(270^{\circ} + x)}$$

IVC

$$M = \frac{250 \text{sen}x}{\text{senx}} + \frac{60 \text{sec}x}{-\text{secx}}$$

$$M = 250 - 60$$

$$M = 190$$

∴ La distancia es de 190 km

Problema 05

Micaela desea saber en que curso obtuvo mayor calificación para ello deberá resolver las siguientes expresiones.

- ightharpoonup Álgebra: $16 \frac{\cos(360^{\circ} x)}{\sin(90^{\circ} + x)}$
- Geometría: 18sen150°
- ightharpoonup R.M: $-7\sqrt{2}$ sec225°
- Física: $15.\frac{\tan(270^\circ x)}{\cot x}$
- ▶ Lenguaje: −28cos240°

RECORDEMOS

$$RT\left(\frac{180^{\circ}}{360^{\circ}} \pm x\right) = \pm RT(x)$$

$$RT\left(\frac{90^{\circ}}{270^{\circ}} \pm x\right) = -CO - RT(x)$$

RESOLUCIÓN

IVC

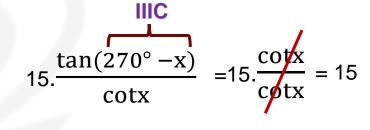

$$16\frac{\cos(360^{\circ} - x)}{\sin(90^{\circ} + x)} = 16\frac{\cos x}{\cos x} = 16$$

IIC

18sen150° = 18sen(180°-30°)
= 18sen30° = 18(
$$\frac{1}{2}$$
)

IIC

$$-7\sqrt{2}\sec 225^{\circ} = -7\sqrt{2}\sec(180^{\circ} + 45^{\circ})$$
$$= -7\sqrt{2}(-\sec 45^{\circ})$$
$$= 7\sqrt{2}(\sqrt{2}) = 14$$

IIIC

$$-28\cos(180^{\circ} + 60^{\circ}) = -28(-\cos 60^{\circ})$$
$$= -28\left(-\frac{1}{2}\right)$$
$$= 14$$

Micaela obtuvo mayor calificación en el curso de álgebra.

Problema 09

HELICO WORKSHOP

Problema 07

Simplifique

$$P = \frac{\text{sen}(90^{\circ} + x)}{\cos(180^{\circ} - x)}$$

Simplifique

$$R = \frac{\sin(90^{\circ} + x)}{\sin(270^{\circ} + x)} + \frac{\tan(270^{\circ} - x)}{\tan(90^{\circ} + x)}$$

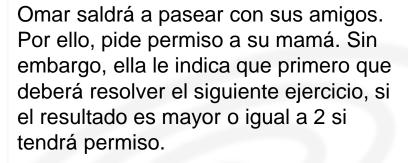

$$T = sec(90^{\circ} + x).cos(270^{\circ} + x)$$

Carla es una joven atleta que se esta preparando para las olimpiadas. Por ello, su entrenador personal le dijo que debe recorrer una distancia de

E =
$$(37 \ 195 \cot 225^{\circ} - 5000 \cdot \frac{sen(180^{\circ} - x)}{\cos(270^{\circ} - x)})$$
m

Determine cuantos kilómetros recorrerá Carla.

$$P = -6 \sec 233^{\circ} + 4\sqrt{2} \sec 225^{\circ}$$

¿Cuál es la respuesta que obtuvo Omar?
