Book review M

Veronica Roth

Divergent is the first novel in a trilogy by American author Veronica Roth, It's science fiction and it's an adventure story too. It tells the story of Beatrice (Tris) and how she tries to find her true identity.

The story takes place in Chicago, sometime in the future. The city has five parts, each with a different personality (honest, selfless, kind, brave and smart). Beatrice grows up in the 'selfless' part, but she doesn't feel that she belongs there. When she's 16, she chooses to go to live with 'the brave'. She does tests to show that she really is brave. She also meets a boy named Four, and together they discover a secret that could hurt her family.

I love this book because it has interesting characters, and because it's exciting. There's action, humor and there's romance as well. I think it's the perfect book for people who love adventure stories. I really recommend it!
