- √ Tag potos

6% OF TEENS THEIR PRIVACY SETTINGS

POSTING AND PRIVACY

If you post something online, it will be available forever. Once you've written comments or uploaded videos, people can download them. You can delete something later. but you can't delete other people's downloads! It's not just what you post that matters - who sees it is just as important.

PERSONA

information such as your address, your phone number, your date of birth or vacation dates.

If your password is 123456 or password, you're using one of the top two worst passwords ever! Other popular 'bad' passwords include superman and football. If you don't use a secure password your accounts won't be safe. Think of secure passwords for each account. These use a mix of lower case and capital letters, numbers

and symbols. Also, use a pattern or PIN screen lock on all your devices. Having secure passwords or screen locks is no good if you share them - don't be tempted!

GEOTAG THEIR PHOTOS ON

Tagging your location (also called 'geotagging') in photos or posts seems like a fun way to tell your friends and family where you are - but potentially anyone could see your exact location or the places you often go. Find out how to turn geotagging off on your phone so you can control when to use it. Would you be happy if a friend tagged you without asking?

Be polite when you write comments. It's easy to be rude online, but comments can really upset people. Only say things

you would say to someone face-to-face.

OF TEENS HAVE SEEN OTHERS
TELL ONLINE BULLIES TO STOP

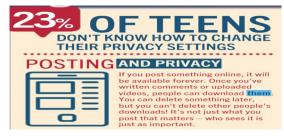

Bullying on social media is more common than you might think, and girls are twice as likely to be the victims of online bullying. An astonishing 90% of teens have seen bullying on social media. If you see it, or someone bullies you, report it.

Digital DOs and Digital DON'Ts

23% OF TEENS DON'T KNOW HOW TO CHANGE THEIR PRIVACY SETTINGS

POSTING AND PRIVACY

If you post something online, it will be available forever. Once you've written

comments or uploaded videos people can download them. You can delete something

later, but you can't delete other people's downloads! It's not just what you post that matters – who sees it is just as important.

It's important to keep yourself safe so never give out personal information such as

your address, your phone number, your date of birth or vacation dates.

PASSWORDS AND LOCK SCREENS

DON'T GET PERSONAL It's important to keep yourself safe so never give out personal information such as your address, your phone number, your date of birth or vacation dates.

If your password is 123456 or password, you're using one of the top two worst passwords ever! Other popular 'bad' passwords include superman and football. If you don't use a secure password, your accounts won't be safe. Think of secure passwords for each account. These use a mix of lower case and capital letters, numbers and symbols. Also, use a pattern or PIN screen lock on all your devices. Having secure passwords or screen locks is no good if you share them – don't be tempted!

TAGGING

Tagging your location (also called 'geotagging') in photos or posts seems like a fun way to tell your friends and family where you are - but potentially anyone could see your exact location or the places you often go. Find out how to switch geotagging off on your phone so you can control when to use it. Would you be happy if a friend tagged you without asking? Probably not! Forty-five per cent of teens say they have removed their name from photos where they're tagged, so check first.

Be polite when you write comments. It's easy to be rude online, but comments can really upset people. Only say things you would say to someone face-to-face.

84% OF TEENS HAVE SEEN OTHERS TELL ONLINE BULLIES TO STOP

Bullying on social media is more common than you might think, and girls are twice as likely to be the victims of online bullying. An astonishing 90% of teens have seen bullying on social media. If you see it, or someone bullies you, report it.
