TechMaster

Screen time? Screen-tastic!

Some adults say that teens are always in front of a computer screen or playing games on a console. But what about the positive side to technology? In today's

TechMaster post we meet four people who use modern tech to get super creative.

Zachary Maxwell is a teenager from New York. He describes himself as shy, but he has meetings with politicians. Why do they meet him? Because of his videos. Zachary made his first documentary when he was eight. He often uses his films to raise awareness about problems in his school or neighborhood. Zach uses a camera to make his films, but don't worry if you don't have one; with a phone, anyone can become a film-maker today.

The app Musical.ly (now called TikTok) helped 16-year-old twins, Lisa and Lena Mantler from Germany, to become social media superstars. The sisters spend 20 minutes a day making videos to post on the app and now have over 16 million followers.

When he was 16, David Eisman started Pixelman Productions. David doesn't write programs. He organizes the team. They're working on their first game, *Mirka*. If you're into video games, why not make one yourself? At make-video-games.com there are lots of tutorials and programs to help you make an awesome strategy game.
